

World Disability Day – Exhibition Visit

On December 3, 2024, in observance of World Disability Day, the ISR Committee of St. Francis College organized a visit to the Indian Social Institute, Benson Town, in association with Fourth Wave Foundation, Bangalore. This visit aimed to promote awareness, inclusivity, and appreciation for the talents and contributions of individuals with disabilities. The event provided volunteers with an opportunity to engage with the disabled community and gain a deeper understanding of their challenges and achievements.

The journey commenced at 12:45 PM, with volunteers departing from the college and arriving at the Indian Social Institute by 1:30 PM. The exhibition showcased a diverse range of artistic expressions, including paintings, sculptures, and crafts created by talented disabled artists. It also featured an awareness campaign and an orientation session, which provided valuable insights into the importance of disability inclusion and empowerment. The exhibition concluded at 4:00 PM, and the volunteers returned to college by 4:45 PM.

The visit proved to be a meaningful and enlightening experience for the ISR Committee members, reinforcing the importance of respecting and celebrating individual abilities, regardless of physical or mental challenges. Witnessing the creativity and resilience of the disabled artists inspired the volunteers to become advocates for greater inclusivity and accessibility within their communities.

We extend our sincere gratitude to the Indian Social Institute for organizing this impactful event and to St. Francis College for providing us with the opportunity to participate. This experience has strengthened our commitment to supporting and empowering the disabled community, fostering a more inclusive and compassionate society.
